WOOD GAS.—CAUTION
Be it known that I, the subscriber obtained letters patent in December, 1851, for an apparatus for the destructive distillation of wood, and the making therefrom of tar or pitch at pleasure, and gas; and that in the judgment of competent persons the invention of an appartus recently patented by W. D. Porter cannot be used by him or any other person without infringing my said patent. And, forther, that what is patented by said Porter rightfully belongs to me, as I expect to prove ere long before the United States Patent Office; and, further, that the use of said Porter's invention involves also a process which I am now claiming before the United States Patent Office, and which has been adjudged to be patentable to the first inventor thereof, and which said W. D. Porter has formally disclaimed, as appears upon the public records of said office, of which an official copy is hereto annexed, and also a copy of his claims.

In the National Intelligencer of the 25th instant Mr. Porter announces that he has secured by patent the "exclusive right to making gas from wood," and threatens prosecution to all parties infringing his patent. I ask how this statement comports with the fact of my patent of December, 1851, and how far the threat can intimidate under such circumstances? Mr. Porter's claim is based upon a movable perforated diaphragm, and was so understood by the Patent Office, as it appears from the records of the Patent Office that his claim was at first refused as interfering with a prior patent to Robert Foulis, of Canada, for an equivalent contrivance. This claim, as given below, and in which the perforated diaphragm is the saving clause, is what Mr. Porter calls securing the "exclusive right to making gas from wood." The statement carries absurdity on its front, and is a libel on the good sense of the Patent Office. If such a claim or right had been granted, it would forbid every coal-kiln and charcoal manufactory in the country.

The following copies of correspondence and extracts from th

D. Porter, under his application for a patent, which letters patent were issued bearing the above date, you are informed that W. D. Porter's claims are believed to be c affined to his apparatus; and, further, this office is not aware that a patent has been granted heretofore for the exclusive right of making gas from wood. THE Ninth Volume of this Paper being
about to be commenced, the proprietor and
editor, after making his grateful acknowledgments
for the steady support which he has received during the last eight years, respectfully solicits a
continuance of the same and such additional support as will enable him to continue his paper, as
an independent journal, and in the support of
those conservative and constitutional principles
which were involved in the late municipal election, and which it is his fixed purpose to maintain,
so long as he is connected with this or any other
public journal. On his future course the editor
deems it unnecessary to dilate. Suffice it to say,
that while the original plan of his paper will be
duly carried out, the editor will also feel himself
bound by the convictions of duty and propriety, to
maintain the constitutional rights of every native
and adopted citizen, and to oppose every secret
organization that is founded on a proscriptive and
exclusive basis. What he intends to do in this
respect may be judged of by what he has already
written and published in the columns of this journal. To his friends, and the friends of civil and
religious liberty, he respectfully appeals for adequate encouragement.

prepared to execute orders for any description of the same liberal terms.

The White Paint is warranted pure, and is unsurpassed by any other article in use. It is sold either dry or ground in oil.

The Brown Zine is made only from the New Jersey Zine Ores, and is extensively used as a protection to iron or other metallic surfaces. It is a cheap and economical paint.

The Brown Stone Color is unequalled as a durable covering for Cottages, 'Depots, Bridges, &c. The consumption of it is very large, and it has given entire satisfaction.

All the paints manufactured by the company are of the highest excellence, some important improvements having recently been discovered and applied in their preparation, and they are warranted to keep soft and fresh in the kegs, any reasonable length of time. In this respect, they are superior to any others in market.

RECOMMENDATIONS.
U. S. NAVY YARD, GOSPORT, VA.,
January 20, 1854.

To C. B. Datmold, President N. J. Zinc Co., N. Y.
Sir: A series of experiments conducted by me, with the utmost care, during the past three years, upon all the various paints and artificial preparations for the preservation of timber, have led me to the important discovery that the White Zinc Paint, manufactured by the New Jersey Zinc Company, serves as a perfect protection against the ravages of the marine worm, and the formation of barnacles, whilst no other paint or preparation of any kind combines the same protective effect.

I am now preparing a full report on this important subject to the Bureaus of Yards and Docks, at Washington, and shall send with it a complete series of specimens of wood and metal plates, which were covered with the different paints and preparations, and then exposed alike for an entire season, in salt water, opposite this navy yard; all of which illustrates, in the most striking manner, the invaluable qualities and decided superiority of your White Zinc Paint over all other kinds paints, especially for marine purposes.

your wants are purposes.

You are at liberty to give full publicity to the above stated facts, which are of too much importance to be kept from the naval and commercial world. I am, respectfully, your obedient servant, JAMES JARVIS,

Inspector U. S. Navy Yard, Gosport, Va.

HISTORY OF DEMOCRACY IN THE UNITED STATES By the Author of the Republic of the United States, &c.

THIS important work is now in press, the first volume of which will be issued early in the autumn of 1854.

The publication of this work will be continued by the subscribers; and in due time they will publish in the several States a complete list of agents, who will be prepared to furnish copies promptly in every part of the Union.

That the author may have ample time to prepare his work according to his views of completeness; that the publishers may be enabled to issue the numbers with promptness and at stated periods, thereby protecting the interest of their agents, the following arrangement is announced in the full confidence that it will prove acceptable to all, viz: To stereotype the next six numbers, making ten in all, thus completing the first volume before any more are published.

The numbers will then be issued monthly, without interruption, to the end. Those who prefer the volume bound will be accommodated without extra charge for binding; and the numbers already published, from one to four, will be taken in part pay, if not injured, at their full cost to subscribers. In announcing this unavoidable delay for a few months, the publishers are not unmindful of the earnest desire of many speedily to possess the work. The necessity of accommodating the author, whose labors are incessant, will appear obvious to all without particular explanation.
